ANUA

Anua engineers and manufactures onsite wastewater (septic) collection, treatment, dispersal and water reuse systems for all sites not connected to municipal sewer systems. We work directly with owners and their design engineers to assist in the permitting process and optimize treatment solutions. We specialize in tailored solutions for campgrounds, RV parks and other outdoor hospitality venues that minimize O&M, allowing operators to focus on running their business and increasing profits. Call us today to learn more about the Anua difference.

CORE SYSTEMS

Developing an app with FOWA to give Maintenance Entities a complete toolkit to automate their maintenance events with property owners, capture verified records, and submit them to the county and state. Property owners get a permanent, plain-English record of their system and what it needs. Government entities — local and state — get oversight access to the same record at no cost. One platform, one record, every party on it.

RIOVATION

RioVation® is a U.S.-based manufacturer of advanced onsite wastewater treatment solutions designed to address real-world septic system challenges. Our flagship BioMaze® Suspended Biofilm Generator® (SBG®) technology delivers an eco-friendly, cost-effective alternative to traditional drainfield replacement by introducing oxygen and cultivating aerobic biology to significantly improve effluent quality. BioMaze® spans a full range of applications—from residential systems and rehabilitation of existing septic tanks to commercial, pre-engineered systems designed for higher flows. By naturally reducing biomat and enhancing treatment performance, BioMaze® helps extend system life, improve environmental outcomes, and provide scalable solutions for decentralized wastewater management.
